SPONSOR PROSPECTUS

VanSpace: BIOS

A micro-conference at Science World, Vancouver

Tue 10 Nov 2026 · 13:00–19:00 · ~150 builders

DEAR POTENTIAL SPONSORS

Vancouver has meetups. It does not have enough rooms like this.

We ran two Luma events in Vancouver this year. Each one crossed 100 attendees. What stayed with us was not the headcount — it was the hallway. People kept talking. They traded notes on what they were shipping. That is the room we are building with BIOS.

[Speech blurb TBD — add the second event name, the story behind the two events, and why you wanted to create BIOS.]

PD budget, not party budget

A weekday event employers will pay for.

Capped density

~150 people, single track. Hallway conversations are real.

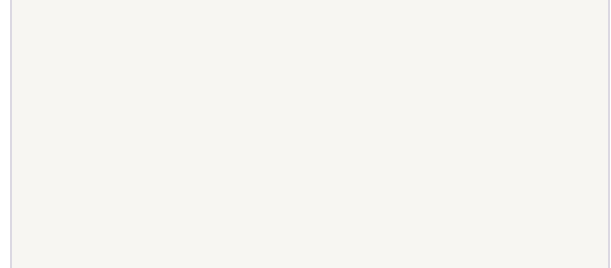

Builders who ship

Full-stack, frontend, and agentic AI — not a booth farm.

Agents of Chaos • 4 Jul 2026 • 100+ builders

 Second Luma event

[Second event photo + caption TBD]

WHAT IS BIOS

One day, one stage, one conversation

BIOS is a single-track micro-conference at Science World. We are capping the room at ~150 so the day stays intimate, and we are building a line-up that justifies taking a weekday afternoon.

Landmark venue

Science World in Vancouver. Easy to reach, hard to forget.

Single track, no noise

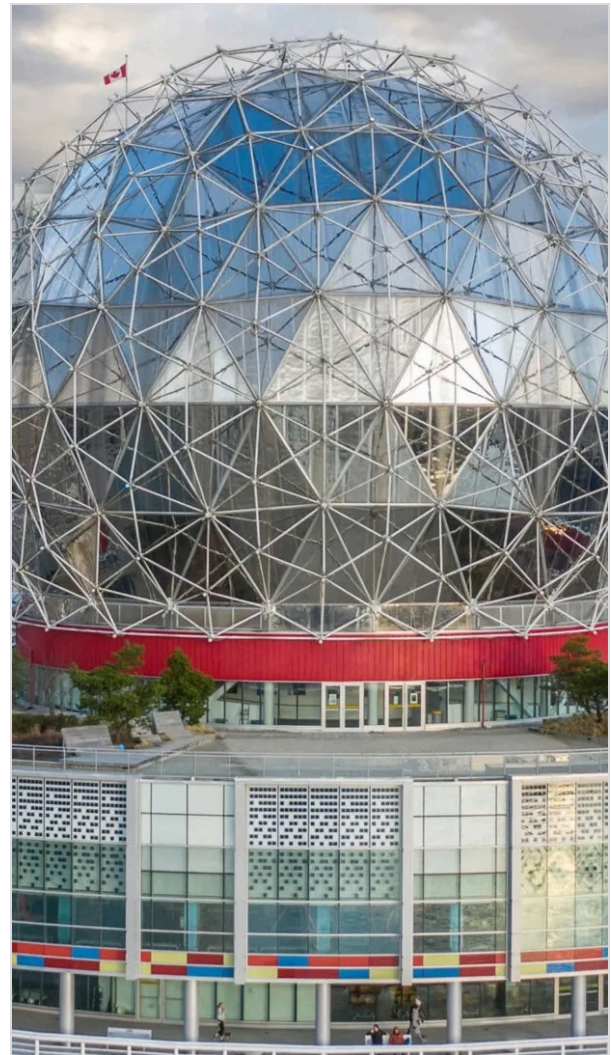

No expo hall, no booth farm, no schedule overload.

13:00–19:00

A weekday event that fits a professional development budget.

Swag bag insert rights

Sponsors can put real items into a bag people take home.

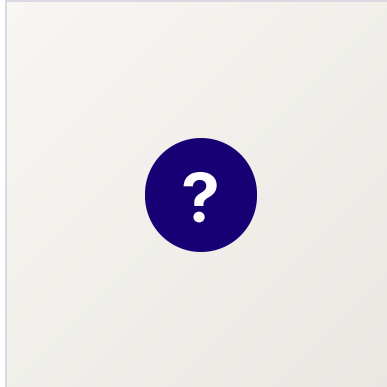

THE SPEAKERS

Opening, closing, and one in between

We are building a single track around a few high-signal voices. The opening and closing are locked. The second keynote will be announced as it is confirmed.

CLOSING

WHAT YOU GET

Brand

Logo on site, emails, socials, and recap content.

Table

Priority or standard activation space in the hallway.

Digital

Recap logo, social tags, and post-event report.

Stage

Keynote, session, lightning, or panel — matched to tier.

Swag bag

Physical insert rights, tiered by size and quantity.

Tickets

Complimentary passes included with every tier.

We reach builders where they already are

In the months before BIOS we are running three hackathons to build momentum, test programming, and introduce the Vancouver builder community to the event. Each one feeds into the next.

01

[Hackathon TBD]

[Date + city + one-line
purpose.]

02

[Hackathon TBD]

[Date + city + one-line
purpose.]

03

[Hackathon TBD]

[Date + city + one-line
purpose.]

Luma + LinkedIn / X

Event pages, speaker drops, and paid organic posts.

Community intros

Partner lists and local meetup co-promotion.

Put your brand in the room

Packages are priced for a keynote-heavy micro-conference, not a 200-person hackathon. Stage time and table space define the tiers; logos are table stakes.

Money goes to the venue, AV and streaming, speaker travel, food and coffee, and the attendee bag. Negotiable terms and category exclusivity can be added to the SOW.
