

Codechella

Sponsor Prospectus

Victoria, BC, August 22nd

Dear Potential Sponsors

Scrapyard Victoria March (Highschool Hackathon) we have 40 highschool students attended and built amazing project to like and gave away a 3d printer

this was the Cafe Cursor December 2025 We bought a cafe for a day and bought all of the Cursor Powered free coffee and snack and share their workflow

Cursor Hackathon in September 2025
We had 100+ signups 60-70 people joined and built something with Cursor in 3 hours

Scrapyard Victoria (High School Hackathon) March 2025: 40 high school students attended, built amazing projects, and we gave away a 3D printer

What were looking for?

We want to invite exceptional builders to Codechella. People who ship personal software and hardware because they enjoy making things. We're looking for builders others want because of their work. People who have built things people want, not just what's on a resume. If you've shipped something impressive on your own, they will be at Codechella.

To run the event well, we're looking for partners who can help in a few ways: software credits and tools so builders can work with strong APIs and platforms during the hackathon, cash funding for venue, food, and operations, and custom swag or accessories participants will actually use. Great builders do their best work when they have great tools and a well-run event behind them.

For companies hiring, Codechella is also a chance to meet incredible talent in person. Builders from Vancouver, Seattle, and Vancouver Island who are already shipping projects on their own time. Each builder shares a list of what they've built, will share that list to all of the Sponsors.

Will do the Marketing

Throughout July, our team will travel between Victoria, Vancouver, and Seattle to build local momentum. We are physically distributing a custom-printed newspaper and zine dedicated to the hackathon within local builder communities. These publications will feature weekly updates about the event, sponsor spotlights, and technical essays. This high-touch, physical approach ensures we reach the most dedicated builders in each city.

We're printing a small newspaper for the Code Chella. It's a physical thing you can pick up, read, and pass along. If you're building something, shipping a launch, or have a story worth telling, we'd love to include it. Copies go out around Vancouver, Victoria, Seattle, and the Bay Area.

Check the sponsor package to add your logo to our merch. We're making an F1-style cap and jacke and every sponsor on them. Tier 1 sponsors get the most visible spots on the front and chest. Tier 2 sponsors are on the sleeves, sides, and back. Same gear for organizers and winners, built to look like real racing team kit, not generic event swag.

Sponsor Package

Note that packages can be discounted and negotiated with offers with credits or referrals.

We will use the following sponsorship package on the following

- Venue rental and event space for the hackathon
- Meals, snacks, and beverages for all participants
- Prizes, awards, and dedicated prize slots for winners
- Custom swag, merch, and participant materials
- Marketing, signage, and event branding across digital and physical channels
- Workshop supplies, tools, and technical resources for build sessions

We will get our access to our expenses and budget once the sponsor packages have been finalized.
